

## START-UP

**Spanjaard Start up** is an instant starting aid with upper cylinder lubricant for all engines when starting is a problem in cold and damp weather. Contains upper cylinder lubricant.

### APPLICATIONS

- Vaporise in cold and damp conditions, giving first time starting.
- Used for starting all petrol, diesel and paraffin engines in cold and damp weather.
- Contains high vapour pressure hydrocarbons to give instant starting and dispersants to deal with any condensed water.
- A special upper cylinder lubricant is also included to reduce wear before oil circulation begins.
- A special inhibitor gives controlled burning of fuel instead of explosive and damaging pinking.

### DIRECTIONS FOR USE

#### Petrol Engines:

- Do not choke or flood carburettor.
- Spray directly into air-intake for 2-3 seconds while ignition is off and engine is stationary.
- Start in normal manner.

#### Diesel and Paraffin Engines

- Check fuel filter for wax blockage that might have crystallized out of the fuel due to sudden cold temperature.
- Do not use heater plugs.
- Spray directly into air-intake for 2-3 seconds. Start engine in normal manner.

### PROPERTIES

<b>Colour:</b>	Yellow
<b>Features:</b>	<ul style="list-style-type: none"> <li>• Appearance: Liquid</li> <li>• Relative density @25°C : 0.738</li> </ul>

### PACKAGING

350 ml Aerosol can

Revision: 210524
